On..

E-Commerce Website(Wristwatches)

Developed By..

Hardik Parmar

Submitted to ..

Geetanjali College of computer science & commerce(BBA)

Saurashtra Univetsity

Rajkot

2026-27

Guided by..

Prof. Harsh Joshi

Acknowledgements

The success and final outcome of this project required a lot of guidence and assistance from many people and I am extremely privileged to have got this all along the completion of my project all that I have done due to such supervision and assistance and I would not forget to thank them.

I would like to thank my project coordinator and my faculty guide for his valuable guidance for the project and I would like to thank my project partnet who helped me through my entire project.

Preface

The purpose of this E-Commerce website is to improve the user experience and their awarenesses.

The E-Commerce Website project will be used to minimize the time and the resource by enhancing product purchasing technique and seamless experience.

While the resources which minimized are workforce,money and paper etc.

The website is user-friendly and will help the watch purchasers.

Project Profile

Project Title	E-Commerce Website(Wristwatches)
Objective	The E-commerce Website will provide user a better experience of purchasing the Wristwatches.
Hardware Requirements	Pentium 90 MHz or faster and 4GB RAM or higher
Software Requiremnts	Any Browser like Chrome
Front-End	React JS, TailwindCSS
Back-End	NodeJS, Express
Database	MongoDB
Others	Ms-word 2022

Project Requirement

- Hardware Requirement

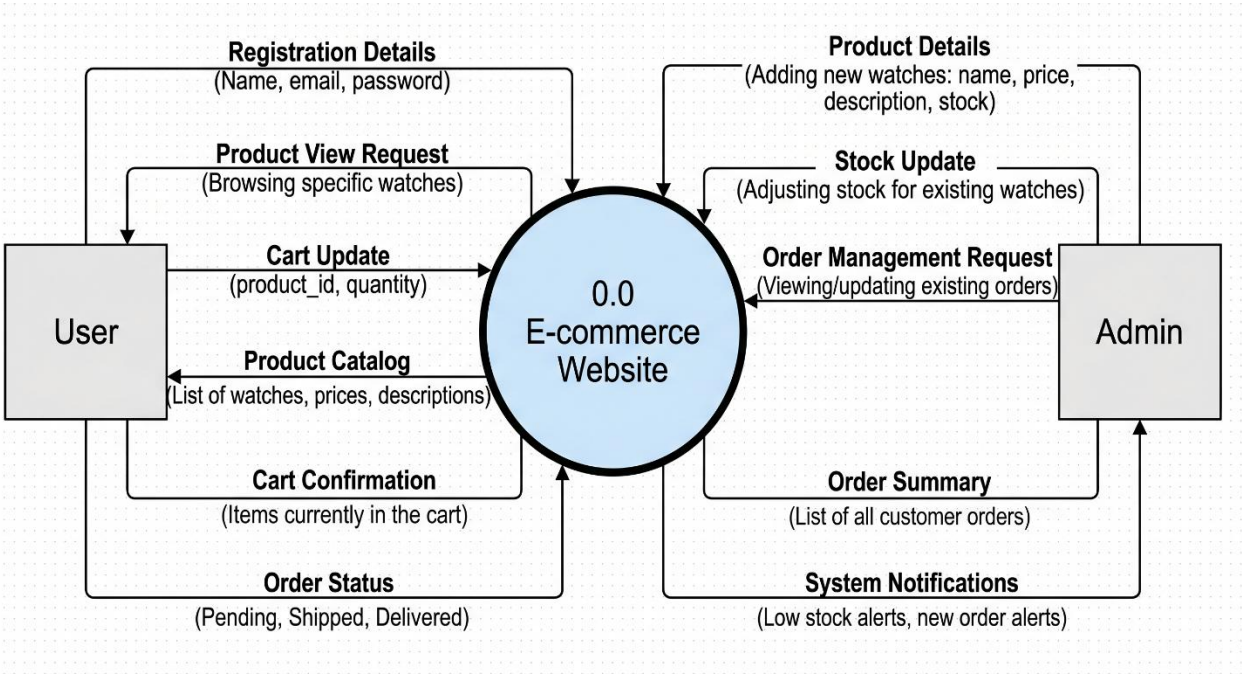

Hardware Name	**Hardware**
Processor	Pentium or AMD
storage	800MB or Higher
RAM	4GB or Higher

Technology Requirements

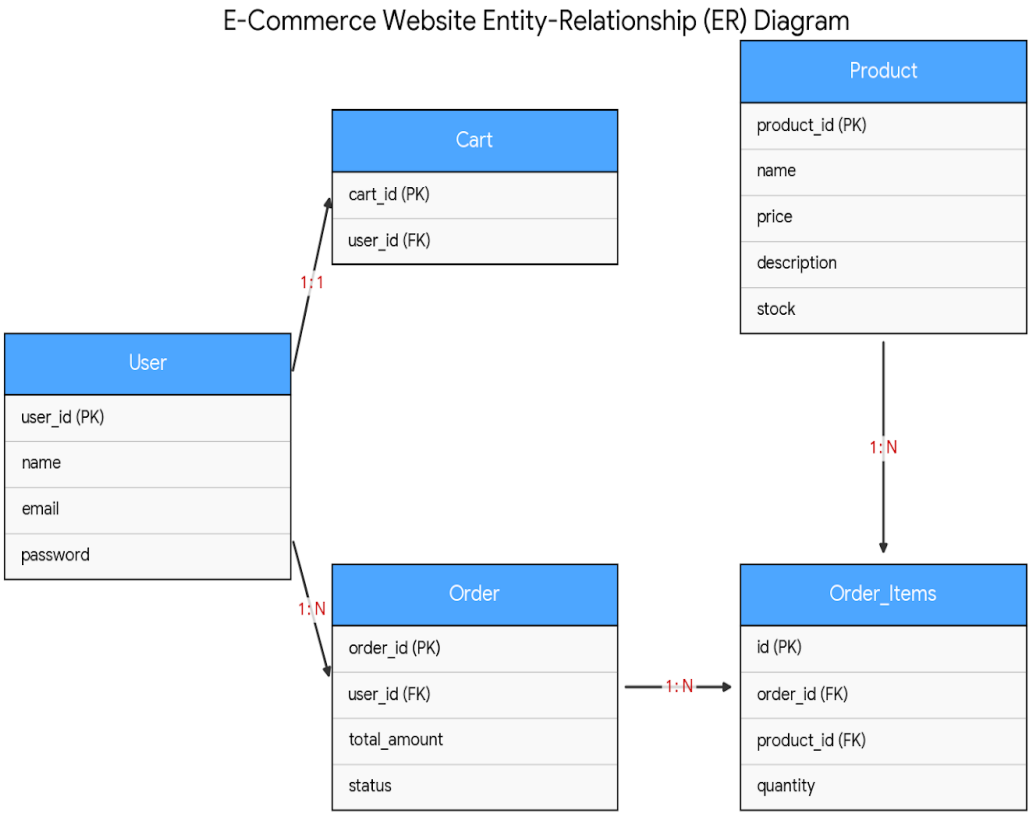

- Software Requirements

No.	**Software Used**
1	Google Chrome
2	Windows OS (Windows 10/11)
3	Visual Studio Code

Data Dictionary

- **User_table**

Sr No.	Field Name	Data Type	Size	Constraints
1	user_id	ObjectId	-	Primary Key
2	name	Varchar	255	Not Null
3	email	Varchar	255	Unique
4	password	Varchar	255	Not Null

- **Product_table**

Sr no.	Field Name	Data Type	Size	Constrains
1	product_id	ObjectId	-	Primary Key
2	name	Varchar	255	Not Null
3	price	Decimal	-	Not Null
4	description	Text	-	-
5	stock	Int	-	Default

- **Cart**

Sr No.	Field Name	Data Type	Size	Constraints
1	cart_id	ObjectId/Int	-	Primary Key
2	user_id	ObjectId/Int	-	Foreign Key

- **Order**

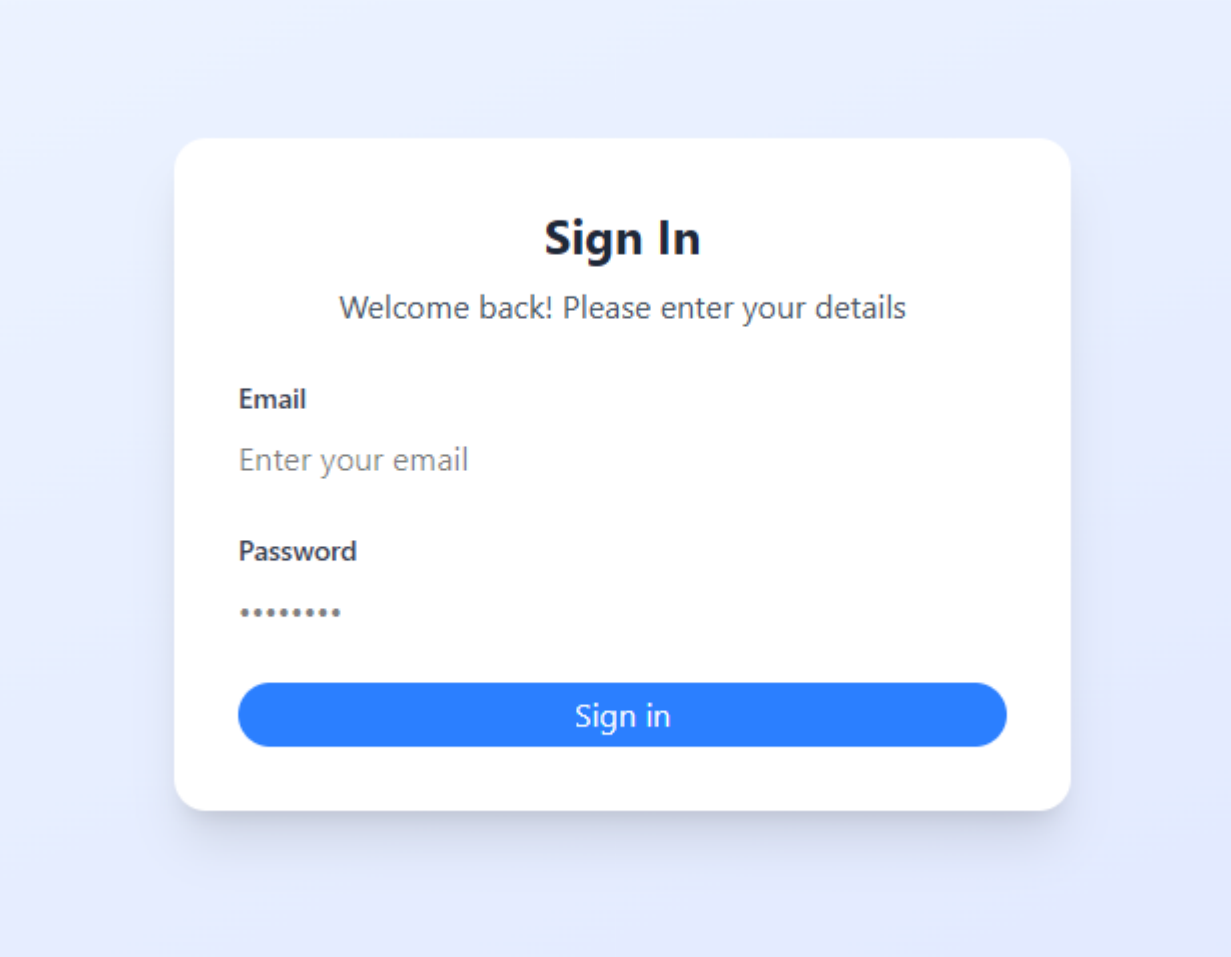

Sr No.	Field Name	Data Type	Size	Constraints
1	order_id	ObjectId	-	Primary Key
2	user_id	ObjectId	-	Foreign Key
3	total_amount	Decimal	-	Not Null
4	status	Varchar	50	Pending/Delivered

- **Order_Items**

Sr No.	Field Name	Data Type	Size	Constraints
1	id	ObjectId	-	Primary Key
2	order_id	ObjectId	-	Foreign Key
3	product_id	ObjectId	-	Foreign Key
4	quantity	Int	-	Not Null

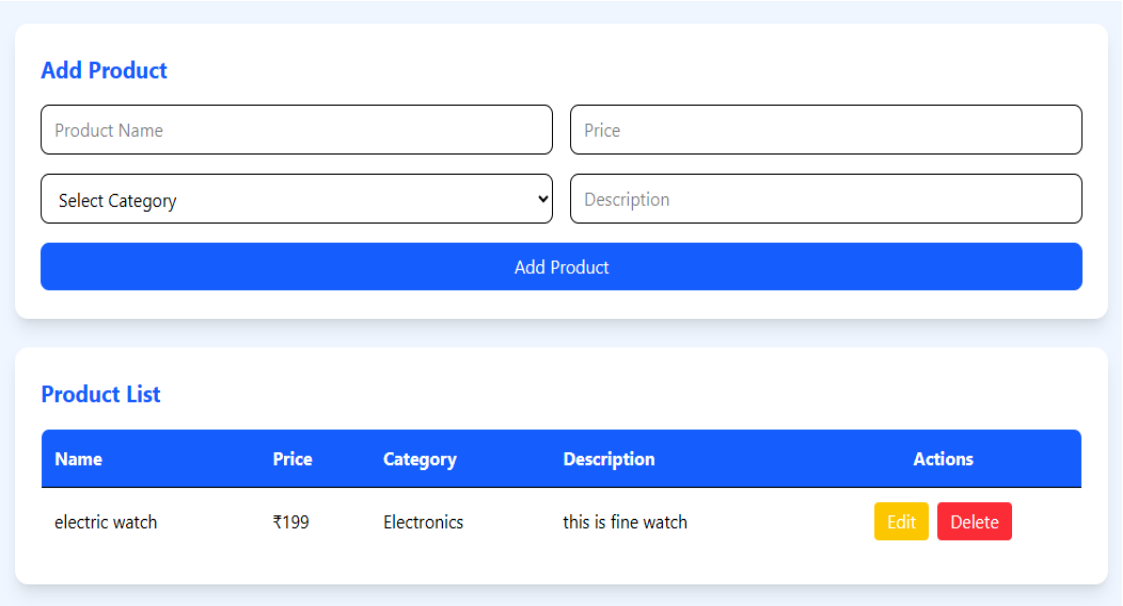

Screen Shots

- **Admin Login Page**

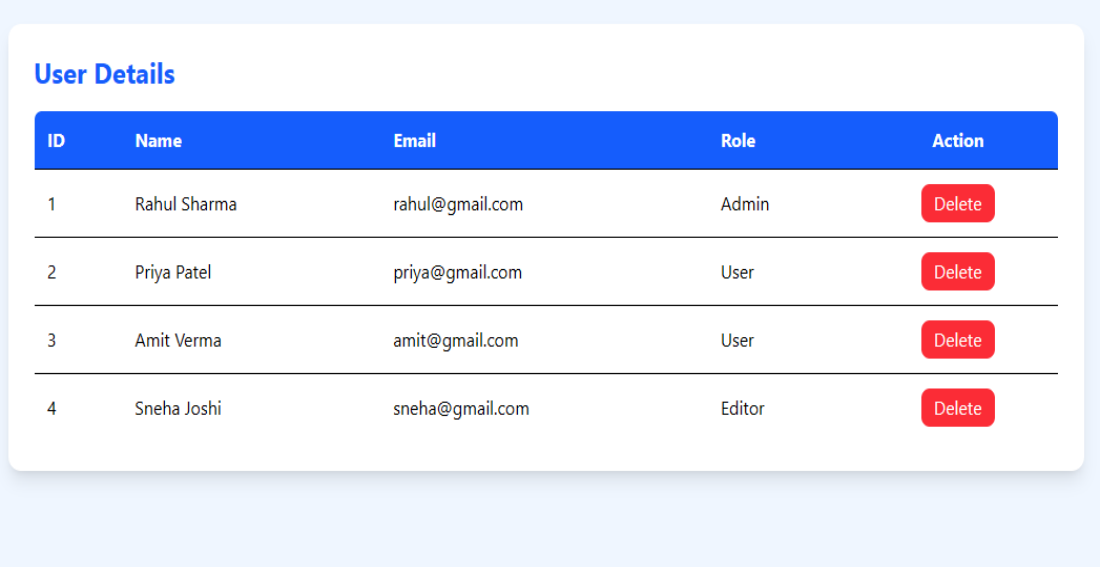

- In this page admin can enter the main page using correct username and password. It is an authentication for all admin.

➢ Admin panel

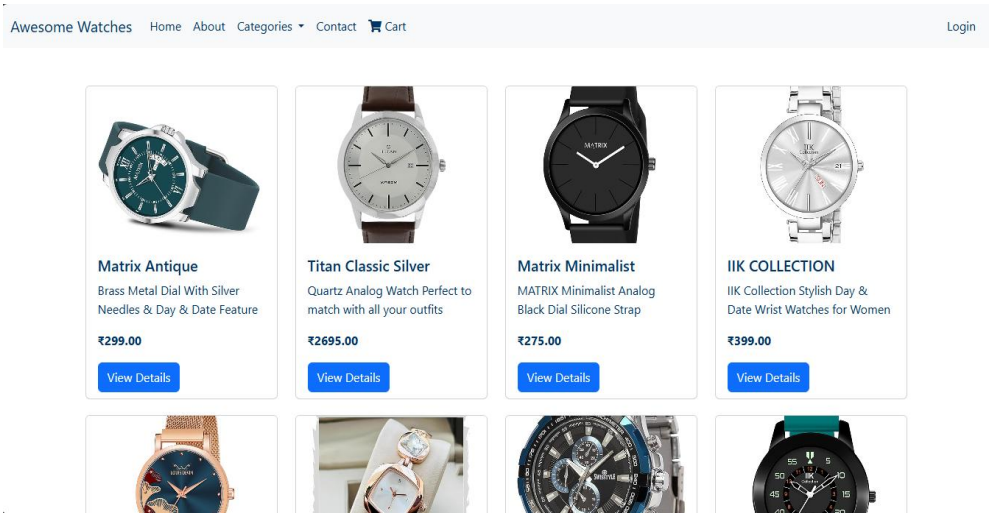

- This is the main dashboard of admin panel in this page admin can add product, user and also can view products and users.

➢ User detail page

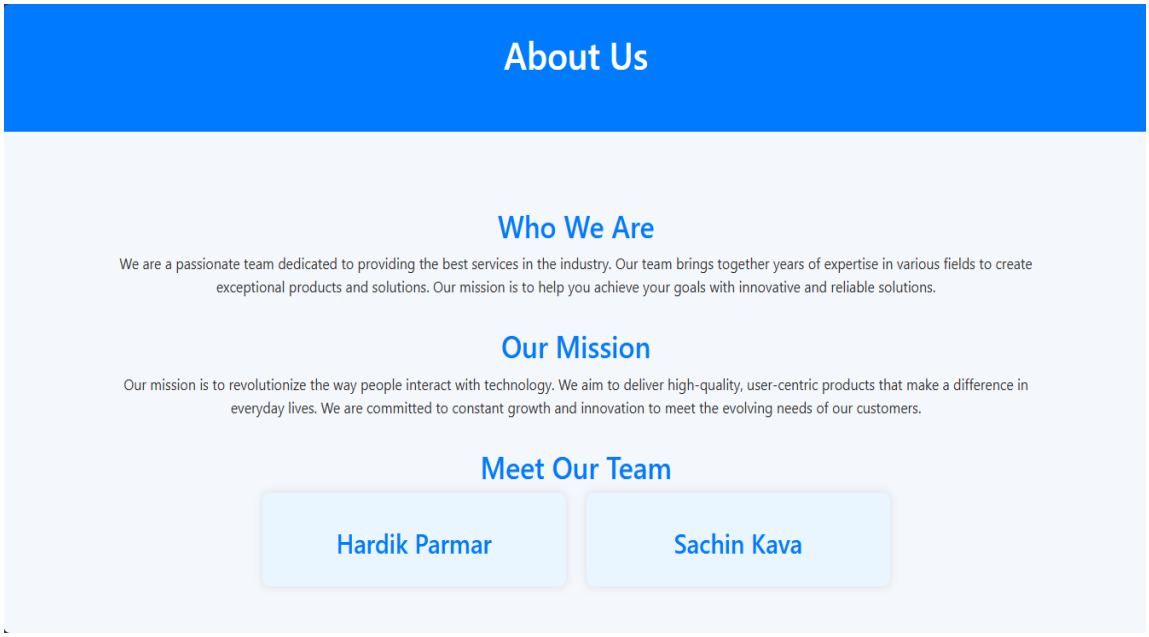

- In this page admin can add product. Admin needs to fullfill all the fields to add product.

➢ Home page

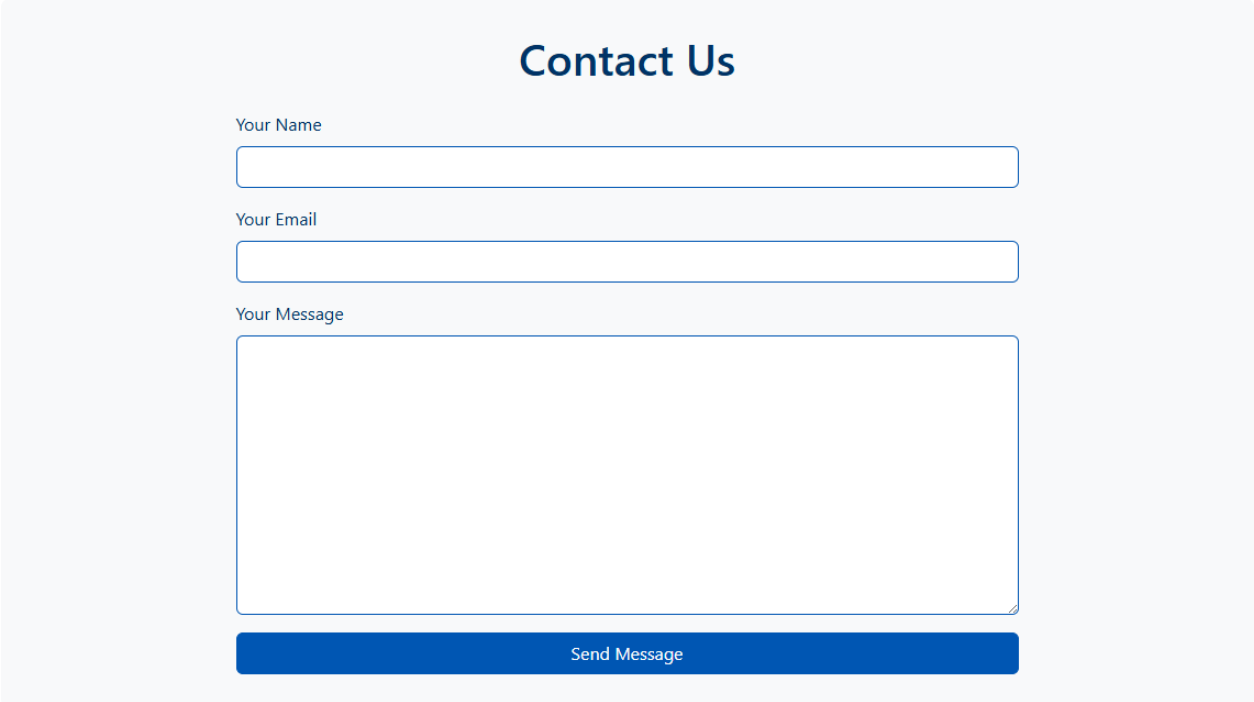

- This is the main home page of our website.
- You can see all products and the menu also can se the categories.

➢ About page

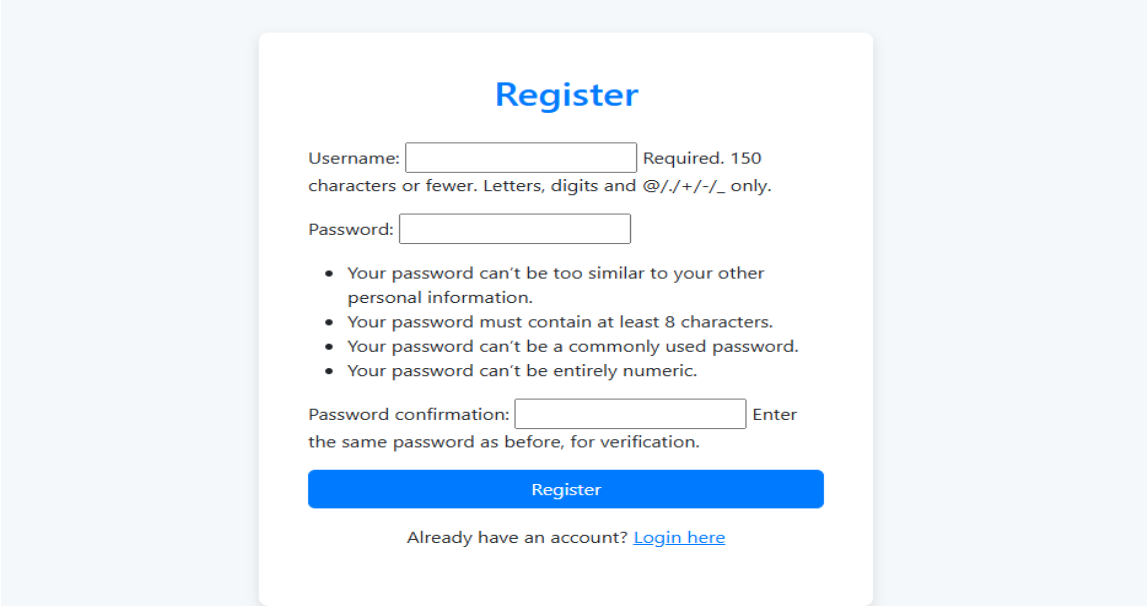

- This is the about page it contains the basic information about the website.

➢ Contact Page

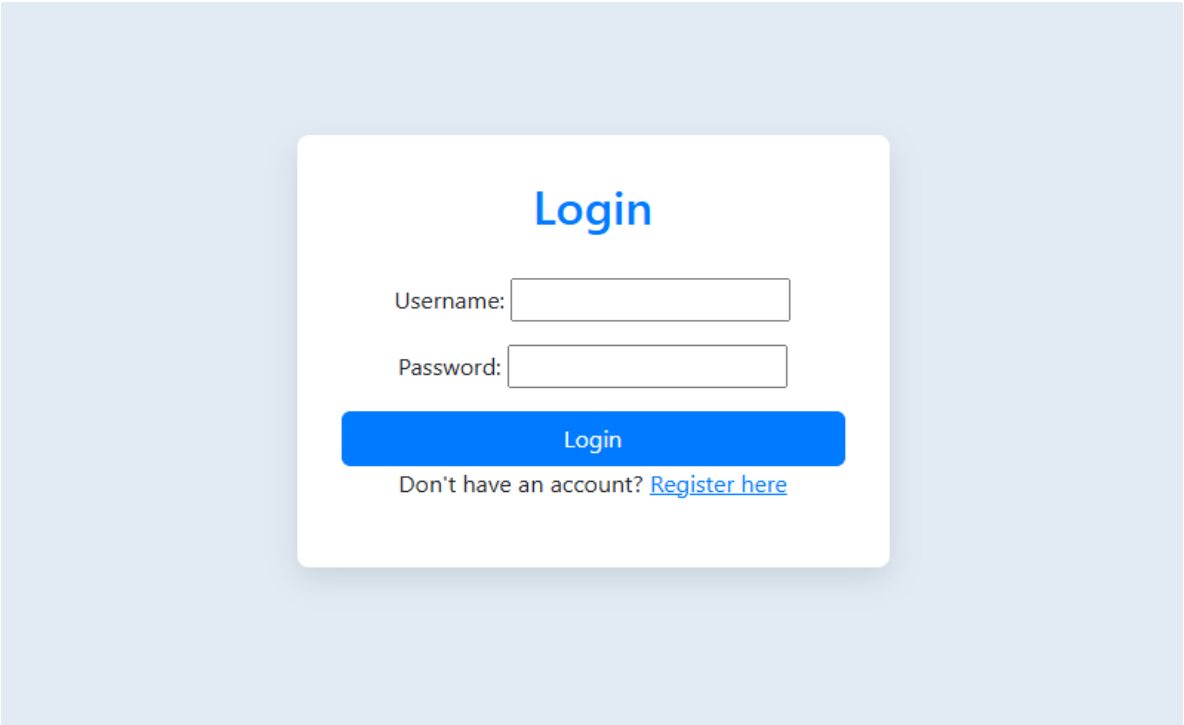

- This is the contact page it helps customer to contact with the site developers.

- Down there is the payment method which is only ‘cash on delievery’.

➢ Order Summary Page

- This page is order summary page.
- In this page user can see the order's all details and total price that has to be paid.

Future Enhancements

Our software “Library Management System” which provides complete information about Users like Student and admin.

We will add more content on them in future. In our web-based application right now, only Books and Users with their information available but in future we will add Online Lectures, Links, etc.

We will also provide more images in GUI related to our software in future. We will try to find out more about this topic and add in future. We will try to make this application more attractive so that visitor cannot get bored while using it.

Limitations

- **User Limitations**:
  - **Concurrent Users**:

    The system may struggle with performance if too many users access it simultaneously, leading to slow response times or crashes.

  - **User Authentication**:

    Limited user authentication methods may expose the system to unauthorized access.

- **Functionality Limitations**:
  - **Search Functionality**:

    Basic search capabilities may not support advanced queries, such as filtering by multiple criteria.

  - **Reporting**:

    Limited reporting features may restrict users from generating customized reports on user activity or inventory status.
