2026-27

Guided by..

Prof. Kishorsinh Vala

Acknowledgements

The success and final outcome of this project required a lot of guidence and assistance from many people and I am extremely privileged to have got this all along the completion of my project all that I have done due to such supervision and assistance and I would not forget to thank them.

I would like to thank my project coordinator and my faculty guide for his valuable guidance for the project and I would like to thank my project partnet who helped me through my entire project.

Preface

The purpose of this E-Commerce website is to improve the user experience and their awarenesses.

The E-Commerce Website project will be used to minimize the time and the resource by enhancing product purchasing technique and seamless experience.

While the resources which minimized are workforce,money and paper etc.

The website is user-friendly and will help the watch purchasers.

Project Profile

Project Title	E-Commerce Website(Wristwatches)
Objective	The E-commerce Website will provide user a better experience of purchasing the Wristwatches.
Hardware Requirements	Pentium 90 MHz or faster and 4GB RAM or higher
Software Requiremnts	Any Browser like Chrome
Front-End	React JS, TailwindCSS
Back-End	NodeJS, Express
Database	MongoDB
Others	Ms-word 2022

Project Requirement

- Hardware Requirement

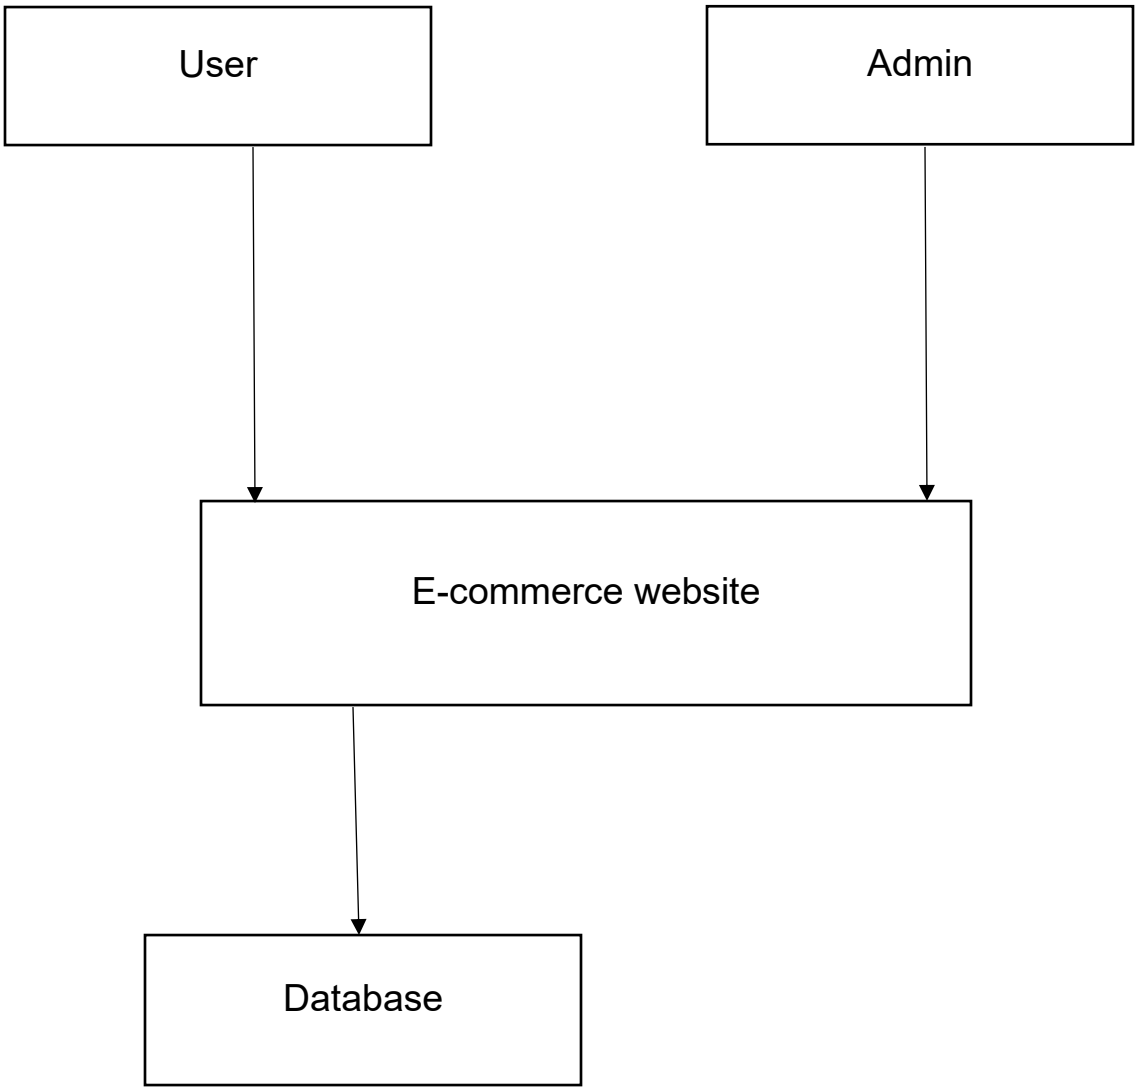

Hardware Name	**Hardware**
Processor	Pentium or AMD
storage	800MB or Higher
RAM	4GB or Higher

Technology Requirements

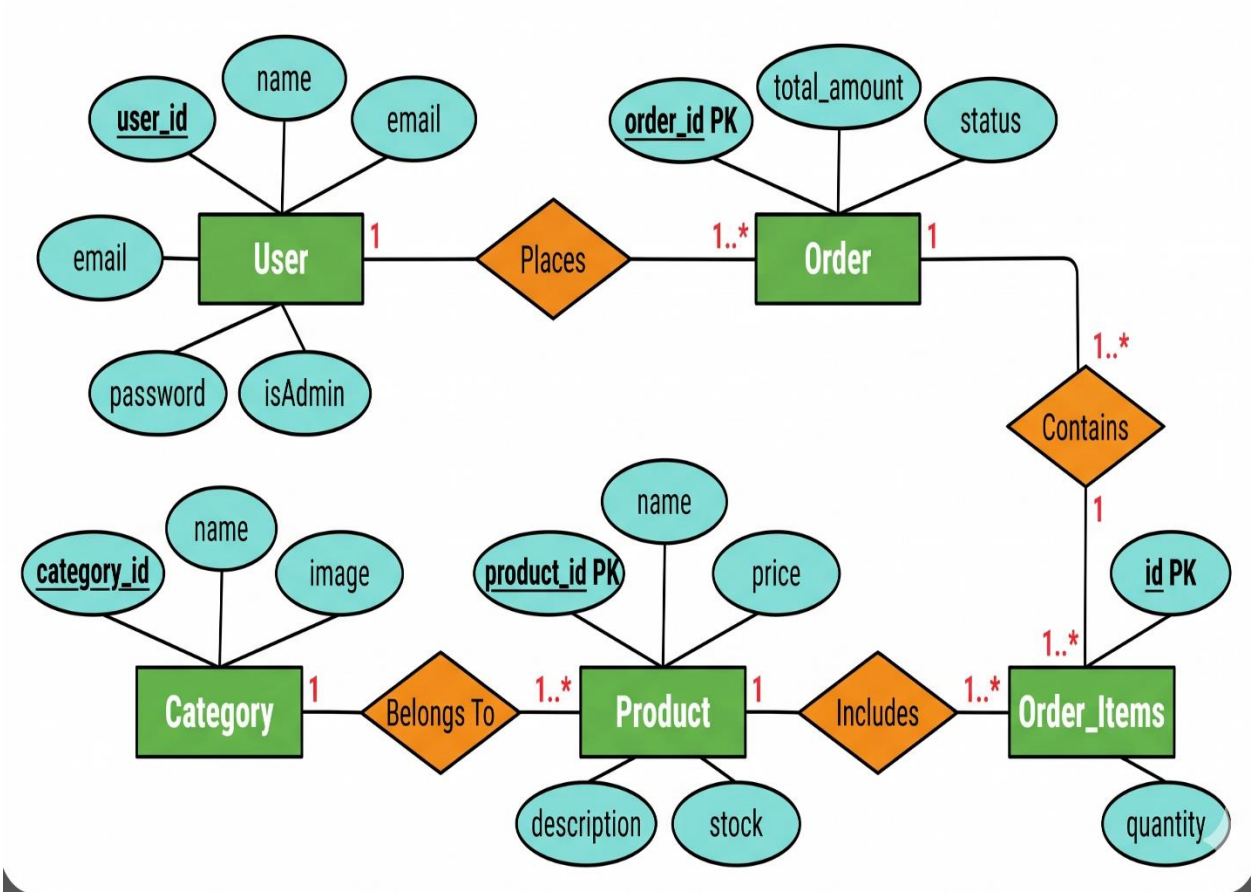

- Software Requirements

No.	**Software Used**
1	Google Chrome
2	Windows OS (Windows 10/11)
3	Visual Studio Code

- Down there is the payment method which is only ‘cash on delievery’.

➢ Order Summary Page

- This page is order summary page.
- In this page user can see the order's all details and total price that has to be paid.

Future Enhancements

Our software “Wristwatch E-Commerce System” which provides complete information about Users like Customer and admin. We will add more content on them in future. In our web-based application right now, only Watches and Users with their information available but in future we will add Custom Designs, Reviews, online payment etc. We will also provide more images in GUI related to our software in future. We will try to find out more about this topic and add in future. We will try to make this application more attractive so that visitor cannot get bored while using it.

Limitations

- **User Limitations**:
  - **Concurrent Users**:

    The system may struggle with performance if too many users access it simultaneously, leading to slow response times or crashes.

  - **User Authentication**:

    Limited user authentication methods may expose the system to unauthorized access.

- **Functionality Limitations**:
  - **Search Functionality**:

    Basic search capabilities may not support advanced queries, such as filtering by multiple criteria.

  - **Reporting**:

    Limited reporting features may restrict users from generating customized reports on user activity or inventory status.
